

ZipState

Description: The ZipState macro takes a five character zip code and returns a two character state Postal code.

Syntax

```
%ZipState(zipcode,MyStateVar);
```

Notes

The zip code must be a five character code with leading zeros if necessary. If the zip code is not found, the returned argument is blank.

Example

```
DATA one;  
  Input Zip $5.;  
  %ZipState(Zip, StateCode);  
Cards;  
43235  
60601  
;  
RUN;  
  
PROC Print data=one;  
Run;
```
